## National Lottery

The PX400 is perfectly suited for payment in stores. Merchants can thus alternate between managing tasks and taking payment with a customer.

[The National Lottery of Benin uses PX400s to print nearly 500,000 tickets per day. \(https://www.famoco.com/use-case/optimize-management-mobile-agent-national-lottery-benin/\)](https://www.famoco.com/use-case/optimize-management-mobile-agent-national-lottery-benin/)

## Payment at highway tolls

The PX400 is designed to take mobile

money payments at points of sale. You will be able to accept all types of payments from a single device.

## Public transportation

The PX400 is used to generate tickets. It allows agents to deliver tickets with ease while on the move.

[The Ivorian bus network UTB uses PX400s to relieve overcrowding at its stations and facilitate customer payment. \(https://www.famoco.com/use-case/improve-the-user-experience-of-bus-passengers-in-ivory-coast/\)](https://www.famoco.com/use-case/improve-the-user-experience-of-bus-passengers-in-ivory-coast/)

Congo Coders has deployed PX400s in the DRC to digitize highway toll-taxes and facilitate the purchase of tickets.

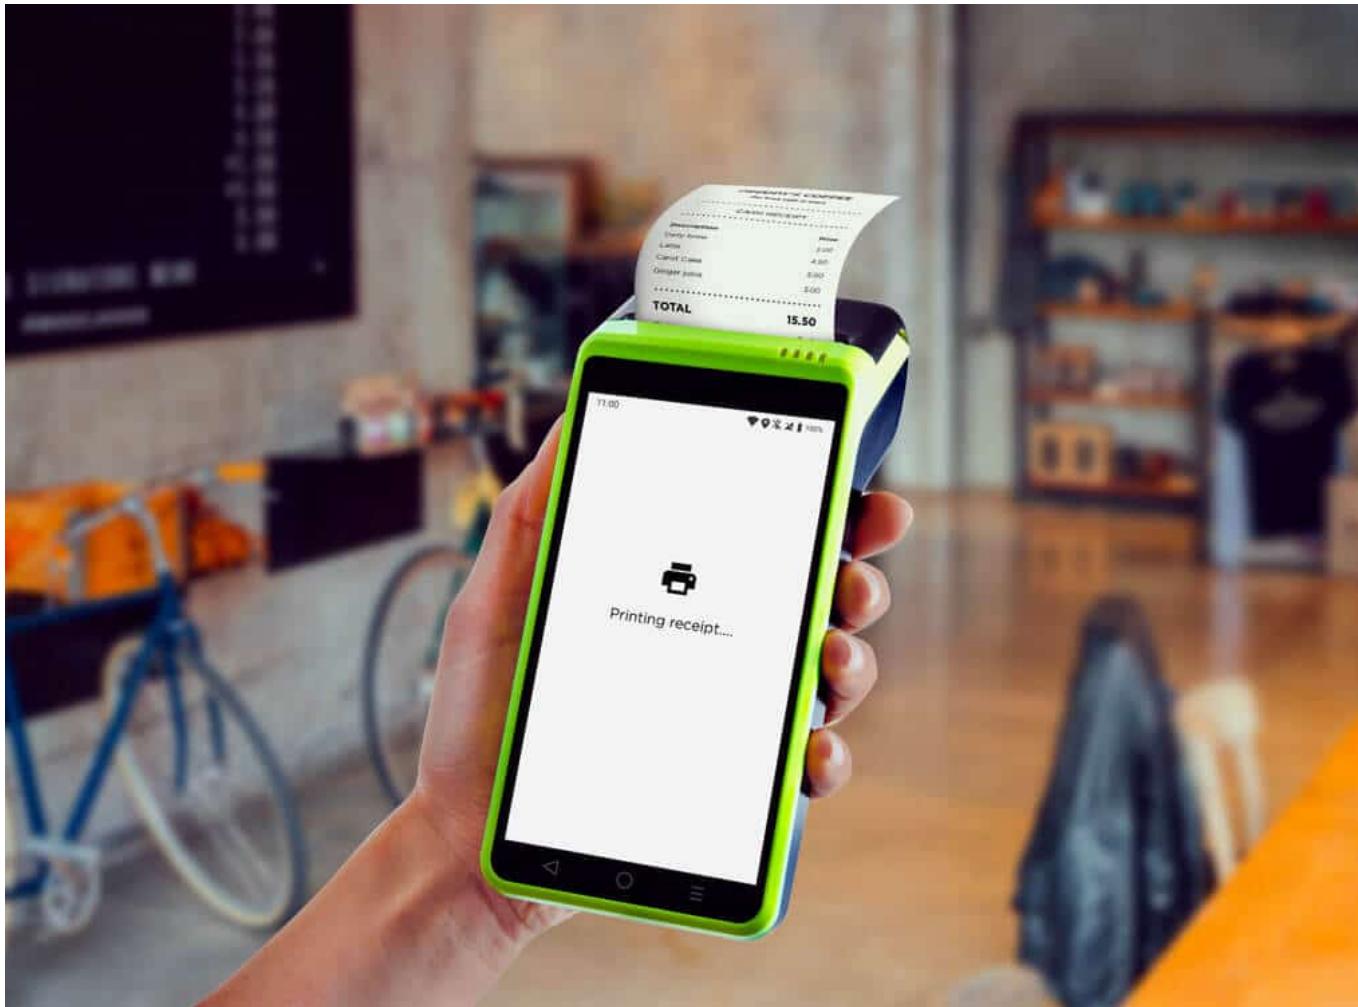

## **High-speed printer**

The PX400 is designed with a built-in thermal printer to ensure continuous receipts printing. The printer needs a standard 58mm paper size, which ensures you always find paper rolls everywhere in the world. Never miss a customer with a high-speed of 75mm/s per receipts.
